Ready for Takeoff at LAX?

Looking to track real-time noise levels at LAX -- along with airplane emissions, flight delays, traffic and airport spending? Well, now you can -- thanks to an online [dashboard](#) that my office released this week in conjunction with the Industrial, Economic and Administrative Survey (IEA) of L.A. World Airports (LAWA).

Read "[This Map of LAX Plane Noise is Weirdly Mesmerizing](#)" on CurbedLA

Among the features you'll find:

- A **real-time noise map** of the area surrounding LAX where users can track the decibel levels of planes that have taken off and landed.
- **LAWA's checkbook**, which shows how much the airports spent in FY 2014-15 on goods and services ranging from luggage carts (\$3.9 million) to fingerprint processing (\$314,425) to dog food (\$11,296--for the police K-9 unit.)
- **Greenhouse gas emissions** data broken down by vehicle type and source. (Airport buses, which run on natural gas, emit comparatively few greenhouse gases.)
- Graphics showing the **value of the goods and services**

LAWA buys by location.

- **J.D. Power rankings** on airport satisfaction.

I hope you'll take some time to explore the dashboard -- and when you find something interesting, let us know by emailing me at controller.galperin@lacity.org.

Sincerely,

L.A. City Controller Ron Galperin
